### Insurance Requirements:

Before the release of equipment, the client of record must provide the following to Videofax:

- Certificate of Insurance naming the client of record as the insured
- Videofax must be named as "Loss Payee" and "Additional Insured"
- Policies must include both liability insurance and either "miscellaneous rented equipment" or "property damage."
- Coverage must meet or exceed the value of all of the equipment being rented from all sources for a given job and state "full replacement value without regard to depreciation".
- Equipment may not be used on Drones or other Aircraft without expressed permission and specific insurance
- Policy duration must cover from pick-up to return of the equipment
- Should damage occur, Producer or Production Company named on the policy is responsible for any deductible amounts

The Producer or Production Company will be responsible for all loss and damage whether or not there is a certificate on file.

If there is not a valid policy or a certificate on file at the time of rental and Videofax agrees to release the equipment, an authorization to cover the deductible amount of the Videofax policy will be held on a credit card until the equipment is returned and checked in.
